

Course in Working safely at heights

Overview

This course applies to employees working above 1.5 metres from floor level with fall protection where protection where required

Entry Requirements

- Prerequisite CPCCOHS2001A – Apply OHS requirements, policies and procedures in the construction industry

Delivery

This course is delivered and assessed over approximately one (1) day through a combination of face-to-face classroom and simulated workplace sessions.

Units of Competency

There is one (1) core unit of competency associated with this course:

- CPCCM1006A Work Safely at heights

Outcomes

It is expected that participants should acquire knowledge, skill and understanding of the following areas:

- Selection and use of appropriate height access and fall protection equipment
- Operate from basic instruction
- Inspection of fall protection equipment, scaffold and fall barriers for faults
- Execution of work within agreed timeframes and standards
- Interpret work orders and locate relevant materials
- Apply knowledge of industry products to identify manual handling risks and types of lifting and support structures approved for use
- Following work instructions to: prevent damage to equipment, select and use appropriate personal protective equipment, minimise risk of injury to self and other workers, identify and use appropriate behaviour for safe work at heights, maintain workplace records of plant and equipment used.

Upon successful completion of this course participants will receive a Statement of Attainment.
